

PSYCHOLOGY – CLASSICAL CONDITIONING

The programme aims to:

1. Before conditioning
 - provide students the general concepts of Classical Conditioning as one of the learning theories in Behaviorism;
 - investigate the empirical studies of Classical Conditioning in understanding how human beings learn in the environment;
 - explain and analyze human behaviours in daily life by applying the concepts of Classical Conditioning.

Intended Learning Outcomes

Upon completion of the online learning course, the participants should be able to:

- identify and define major concepts of Classical Conditioning in learning theories;
- apply theories and concepts of Classical Conditioning to daily life issues about learning;
- critically evaluate the applicability of the concepts of Classical Conditioning in daily life learning and reflect behaviourism in learning theories.
