

Foundation of Probability (E2MAT007C)

Introduction	<p>Probability concepts and theories are often applied in data science and machine learning programming. This course would introduce related probability topics in blended learning mode with online learning and face to face tutorials. Students would follow the teacher's instructions to study the materials to complete each topic. Topics include:</p> <ol style="list-style-type: none">1. Set: Set notations, Venn's Diagram, union and intersection, Cartesian product, Russell's paradox, etc2. Counting and combinatorics: permutations, combinations, binomial theorem, etc3. Probability introduction: probability axioms, distribution, events, expected value, etc <p>The course is about 4 to 5 weeks with an estimated learning hour of 17 to 20 hours with an online assessment.</p>
Programme Type / Level	Probability Course (Level II) (Token-required)
Instructor(s)	<p>Mr Wu Kai Chiu Mr Wu is a quant working in latest AI and big data technology in financial market. He is also a researcher in mathematics and computer science. His research awards include the best paper in conference held in Cambridge and a national Honorable Mentioned thesis. He has been an organizing committee of various mathematical competitions. He was a teacher in mathematics and computer science in local secondary school.</p>
Pre-requisite	No special prerequisites are needed
Target Participants	<ul style="list-style-type: none">➤ S1 – S4 HKAGE student members in 2021/22 school year only➤ Class size: 30 <p>* <i>First-come-first-served.</i></p>
Medium of Instruction	<p>Online course: English handouts, students can ask questions on the online platform in either English or Chinese Tutorial: Cantonese (Supplemented by English) with English handouts</p>
Certificate	<p>E-Certificate will be awarded to participants who have:</p> <ul style="list-style-type: none">❖ Completed all the assignments with satisfactory performance
Intended Learning Outcomes	<p>Upon completion of the programme, participants should be able to:</p> <ol style="list-style-type: none">1. write mathematical expression with set notation and concepts of events;2. solve problems in equiprobability situation by means of combinatorics and binomial theorem3. state and apply probability axioms properly;4. develop self learning skills (e.g. time management, seeking assistance, etc) to complete the programme.
Application Deadline	13 Dec 2021, 12:00 noon
If student members withdraw from the programme after the Application Deadline, the token will be deducted.	

Schedule

Session	Date	Time	Venue
Online Introduction	22 Jan 2022	9:30 a.m. – 10:00 a.m.	Zoom meeting
1st week	24 to 30 Jan	Estimated learning hour : 3 hours	Online platform
2nd week	31 Jan to 6 Feb	Estimated learning hour : 3 hours	Online platform
Tutorial 1*	5 Feb	9:00 a.m. – 10:30 a.m.	HKAGE Rm 303 Zoom Meeting
3rd week	7 to 13 Feb	Estimated learning hour : 3 hours	Online platform
4th week	14 to 20 Feb	Estimated learning hour : 3 hours	Online platform
Tutorial 2*	Postponed 19 Feb	9:00 a.m. – 10:30 a.m.	HKAGE Rm 204 Zoom Meeting
Online assessment	Opening date: 7 Feb Closing date: 28 Feb	2 attempts available. Only the highest attempt would be counted.	Online platform

Remarks:

Online introduction session would explain the arrangement of this course and how to use the related online platforms.

Tutorial session is for students to ask questions about the course content. It is
