

Algebra Course (Level I):

Algebra Enrichment 2

Mr Alfred Yeung Sai Kit

Head of Mathematics of Tai Kwong Hilary College

Application Deadline

3 May 2022 12:00 noon

Result Release

13 May 2022

Intended Learning Outcomes

Upon completion of the programme, participants should be able to:

1. develop critical thinking skills and problem-solving skills via challenging algebra problems and games;
2. apply inductive reasoning to observe the patterns of number sequences;
3. demonstrate problem-solving skills by modelling, representing, analysing and generalizing simultaneous algebraic equations in a variety of problems;
4. devise strategies to solve simultaneous algebraic equations and factorize polynomials problems;
5. manipulate long division of polynomials by applying division algorithm, remainder theorem and factor theorem.

◆ Introduction

Apparently, Mona Lisa, nautilus and sunflower bear no relationship to each other, but in fact all of them are related to the Fibonacci Sequence and the Golden Ratio. This course covers the topics below:

1. introduce essential skills and concepts in algebra such as patterns of various number sequences, arithmetic and geometric sequences, summations, solving linear equation in two unknowns, factorization and division of polynomials;
2. enhance students' curiosity in math with algebra and equip them with deeper algebra understanding for their self-directed learning.

This programme is co-organised with Tai Kwong Hilary College.

◆ Schedule

Session	Date	Time	Venue
1	18 Jun 25 Jun	2:00 p.m. - 5:00 p.m.	Room 403, HKAGE
2	25 Jun 2 Jul		
3 2	2 Jul 9 Jul		
4 3	9 Jul 16 Jul	1:00 p.m. - 4:00 p.m.	Classroom 29, Buddhist Kok Kwong Secondary School
4	23 Jul		Zoom Meeting

◆ Target Participants

- P4 to P6 HKAGE student members only in 2021/22 school year
- Class size: 30

Priority will be given to students who are awarded Certificate of Distinction or Certificate of Merit in Algebra Course (Level 1): Math Magic and Algebra Enrichment 1 (MATP1211 or E1MAT015C).

This programme is the same as Algebra Course (Level 1): Algebra Enrichment 2 (MATP2212) in 2019/20 school year.

◆ Pre-requisite

Students should be able to:

- solve linear equations in one unknown;
- perform basic manipulation of polynomials;
- have basic knowledge of coordinate system.

◆ Medium of Instruction

English with English Handouts

◆ Screening

Please answer the screening questions in the online application form.

*The screening questions are designed to help the applicant understand the course level and the course content. The questions must be answered by the student applicant and it can only be attempted once. The answers cannot be changed once the application is submitted. Selection is based on students' performance in answering the questions. Only students who can demonstrate motivation and knowledge of algebra in the screening questions can be enrolled in the programme.

◆ Certificate

E-Certificate will be awarded to participants who have:

- attended at least 3 sessions; and
- completed all the assignments with satisfactory performance.

◆ Sample Notes

Solve the simultaneous equations using the method of substitution:

$$\begin{cases} \frac{x}{4} + \frac{y}{3} = 7 & \dots(1) \\ 2x - \frac{y}{6} = 39 & \dots(2) \end{cases}$$
