Arts and Technology Course (Level II)

The Missing Link – the Design and Making of an “Arts Tech” Experience

SyZyGy Limited

Application Deadline
20 Dec 2022 12:00 noon

Intended Learning Outcomes

Upon completion of the programme, participants should be able to:

1. understand what skills are required by emerging tech fields especially Arts Tech field;
2. design a user journey with analytical and user-centric mindset;
3. create their own 3D projection work from design to production;
4. apply the concept of Sustainable Development Goals to their decision making in everyday life.

◆ Introduction

This is a project-based learning course.

There will be four phases (see schedule below) for this course and the start would be more about macro understanding on the field as well as training students on how to think and design. The later part touches more on skills training and students will also have chances to practice before the start of their own project.

For phase III & IV, students will be divided into groups and work collaboratively.

In phase III, the practice sessions for students include both projection mapping for table-top and 3D objects. This is to prepare students for their own projects in phase IV.
