# ◆ Introduction

Chinese archaeology has just gone through the first 100 years, although China's underwater archaeology started relatively late, "Nanhai No. 1" symbolizing China's underwater archaeology independent development. It is an important milestone in China's underwater archaeology. In recent years, the "Belt and Road Initiative" has always become the focus of the world's attention, among which the "Maritime Silk Road" is one of the important links, reflecting the interaction between the East and the West across ancient cultures, economies, religions and technology etc.

In this course, students can understand basic concept of archaeology, development of underwater archaeology in China and important shipwreck sites, etc., and introduce the conservation of world cultural heritage on the Maritime Silk Road, in order to broaden students' perspective.
