**Result Release**  
**16 Apr 2024**

## Intended Learning Outcomes

Upon completion of the gifted programme, gifted students should be able to:

1. explain the characteristics, natural history and common species of jellyfish in Hong Kong waters;
2. conduct the artificial seawater and make brine shrimp hatcher to simulate jellyfish habitats;
3. maintain a healthy environmental relationship between humans and jellyfish;
4. build up responsibility for animals and respect for life.

## ◆ Gifted Programme Introduction

The body structure of jellyfish is different from humans and other sea creatures – they are “brainless” and “boneless”; their body mostly consists of water; they can be “untraceable” after death. According to the Agriculture, Fisheries and Conservation Department, six common species of jellyfish have been recorded in Hong Kong waters. Only one specie is venomous and it seldom attacks humans.

This workshop will explain the habits of jellyfish and the common species in Hong Kong waters. Students can have hands-on experience in making a brine shrimp hatcher to simulate jellyfish habitats.

This programme is co-organized with The Salvation Army Tin Ka Ping School.
