◆ Gifted Programme Introduction

The body structure of jellyfish is different from humans and other sea creatures – they are "brainless" and "boneless"; their body mostly consists of water; they can be "untraceable" after death. According to the Agriculture, Fisheries and Conservation Department, six common species of jellyfish have been recorded in Hong Kong waters. Only one specie is venomous and it seldom attacks humans.

Not only the habits of jellyfish and the common species in Hong Kong waters, students will also be equipped with public speaking skills, allowing them to present their findings in jellyfish to others.

This programme is co-organized with The Salvation Army Tin Ka Ping School.
